Abstract (en)  
[origin: EP2535109A2] The device (1) comprises a refill (2) and a perforated plate having multiple holes among which pipette tips are inserted. One of the pipette tips covers the bottom cup having a stiffness of up to 300 N/mm. A holder (3) has a receptacle for insertion of the refill pack. The supporting units of the refill are provided between refill and holder, when the refill is inserted in receptacle. An independent claim is included for method for manufacturing refill package.
