Abstract (en)  
[origin: EP2535486A2] The door system (1) has a locking device which locks door panel (2), in its closed position. A locking element (8) is arranged in a driving device (7). A locking element is provided with a bolt (6) which is engaged with bolt receptacle (9), when locking element is in locking position. The door panel is deformed by the introduction of force in the direction perpendicular to plane of door. The projection is arranged adjacent to bolt receptacle, on potential intrusion side of door panel.
