Abstract (en)

[origin: EP2535489A2] The handle (10) has an electronic assembly (30) comprising sensor elements (31,32) and electronic device (33), arranged in the vicinity of the handle and set in communication with a vehicle side security system (2). The sensor elements and electronic device are connected to each other and are arranged on two different portions of handle. In the first portion, the sensor elements are arranged and in the second portion, the electronic device is arranged. The handle has a component-free cavity (11), and a thin-walled sheath (12) functioning as a carrier for the sensor elements.
