Abstract (en)  
An outdoor unit for an air conditioner in which a pair of motor support tables are disposed at an upper portion of a housing, and an outdoor fan having a fan motor is supported on the pair of motor support tables, and air sucked from a side of the housing through a heat exchanger in the housing by the outdoor fan is upwardly blown out, characterized in that a rectifying unit for guiding airflow passing through the heat exchanger and reaching a lower surface portion of each of the pair of motor support tables to an outer radial direction of the outdoor fan is provided at at least one of lower and upper sides of each of the motor support tables, wherein the rectifying unit is configured to be uniformly upwardly sloped from an inside of the motor support table to an outside of the motor support table.
