Abstract (en)

[origin: WO2011101253A1] The invention relates to an electric hand power tool (100) comprising a cylindrical device section (105, 110), a control element (120) displaceable about the cylindrical device section, and an electric scanning device (210) disposed at the device section for determining a rotary position of the control element, wherein the scanning device is set up for optically scanning the rotary position.
