Abstract (en)
[origin: WO2011101814A1] Set comprising at least one first and one second stackable bottle (1), wherein each bottle is made of a material such that the bottle can be made by blow moulding, and wherein each bottle comprises a top piece (12) which is mounted around a bottle neck (4) and which extends to a peripheral part of the bottle, wherein the top piece is dimensioned such that in a stacked position of the first and second bottles, the top piece of the first bottle lies against a peripheral base part (7) of the second bottle, wherein a handle (31) is connected with said top piece within said peripheral part of the bottle and at a distance from this peripheral part of the bottle.
