Abstract (en)
[origin: WO2011101873A1] A multi-function anti-theft system (1) is described, particularly aimed to protect against thefts the products exhibited for sale, comprising a first anti-theft subsystem composed of at least one detecting system of a magnetic type; or a second anti-theft subsystem composed of at least one opening-preventing system (2) comprising detecting means of a forced opening of an anti-theft mechanism, said system (2) being equipped with emitting means of a sound and/or lighting alarm signal (4) in case of said forced opening; or a third anti-theft subsystem composed of said detecting system of a magnetic type cooperating with said opening- preventing system (2), said opening-preventing system (2) being further equipped with receiving means (8) of a signal emitted by said anti-theft detecting barriers in case of illegal passage, said receiving means (8) cooperating with said emitting means of an alarm signal (4) in case of said illegal passage to emit said alarm signal; or a fourth anti- theft subsystem composed of said third anti-theft subsystem and of at least one recognition system (10) of an active detaching device.
