Abstract (en)  
[origin: WO2011098331A1] The invention relates to an impeller (15) of a device (11) for variable adjustment of the control times of gas exchange valves (9, 10) of an internal combustion engine (1) having a substantially cylindrical hub element (17) and at least one blade (18) which extends radially to the outside proceeding from the hub element (17), wherein at least the hub element (17) is produced from a non-metallic material.
