Abstract (en)

[origin: WO2011101232A2] The invention relates to a refrigeration device, especially a domestic refrigeration device, which comprises a compressor (8) having at least one support (23), a carcass (2) having a compressor carrier (18) with at least one first and one second fastening element (21, 22) on which the at least one support (23) is mounted and to which it is fastened by securing means (25). An individual securing means (25) is designed for the form-fit connection to the at least one first fastening element (21) and to the at least one second fastening element (22).
