Abstract (en)
[origin: WO2011098618A1] The present invention relates to a method for transferring an image from a mobile telephone device referred to as the transmitter (E) to another mobile telephone device referred to as the receiver (R), the method comprising a step (1) of preparing the transfer during which the user selects an image (P) stored in a memory of the transmitter (E), a receiver (R) is selected following a discovery phase and a radio frequency call is established between the transmitter and the receiver, a step (3) in which said transfer is confirmed by the user and a step (2) of actual transfer of said image (P) during which the actual transfer of said image begins. The method is characterized in that said actual selected image (P) transfer step (2) follows the step (1) of preparation for transfer of said image (P) and precedes the step (3) of confirmation of said transfer by the user. The present invention also relates to an image transfer system, to a mobile telephone device and to a computer program.
