Abstract (en)  
[origin: EP2538001A1] The post has a rabbet (11) including two sidewalls (16, 17), where the rabbet receives an end of a panel having a corrugated profile with warped chain edges (21) and weft threads (19). The sidewalls are spaced apart a distance equal to the width of the corrugated profile, where free edges of the sidewalls are not bent. One of the sidewalls includes cut-outs opening laterally towards the outside of the post, where the cut-outs are elongated for receiving an end of some of the weft threads of the panel to allow the introduction of the corrugated profile in the rabbet to lock the panel.
