Abstract (en)

[origin: EP2538012A2] The holding device (1) has a spring arrangement (7) and a hook element (8), where the holding device is pre-stressed by the spring arrangement with a pre-stressing force against a surface element (2). The holding device is supported by engaging the hook element in a profile frame (3). The profiled frame has a recess (4) for holding the surface element that is fixed on a clamping groove (5). The hook element is engaged in the clamping groove of the profiled frame in an inserted position. A bar (9) is inserted in a gap (10) between the surface element and the profile frame.
