Abstract (en)

[origin: WO2011104710A1] The present invention relates to a device (1200), systems and methods for monitoring analyte concentration in a flowing fluid in real time, and in particular a device, system and method for monitoring urine in real time providing for measuring urinary parameters in real time and over an extended period of time with electrodes (1202) that are disposed essentially perpendicularly relative to the flowing fluid (1211).
