Abstract (en)

[origin: WO2011104010A2] The light paste-like refractory adhesives which harden when dried and which contain at least one light-weight filler, a binder, fibers and/or wollastonite and water are characterized in that an organic-inorganic binder (hybrid binder) is used as the binder, said binder containing finely divided silicic acid and an organic polymer. The material or the mortar contains white clay or kaolinite and silica gel, especially silica.
