Abstract (en)

[origin: WO2011104500A1] An electrical or electro-optical assembly comprising a substrate comprising an insulating material, a plurality of conductive tracks present at least one surface of the substrate, at least one electrical or electro-optical component connected to at least one conductive track, and a continuous coating comprising a plasma-polymerized polymer completely covering the at least one surface of the substrate, the plurality of conductive tracks and the at least one electrical or electro-optical component.
