Abstract (en)

[origin: WO2011104058A1] The invention relates to a proportional valve (1), comprising a piston guide sleeve (4) and a valve piston (3) that can be moved in the piston guide sleeve (4), and further comprising a check valve (13) arranged in a pressure medium inlet (10) to the proportional valve (1). According to the invention a proportional valve (1) is provided, in which the adaption of the check valve (13) to the proportional valve (1) is improved with respect to the prior art. This is achieved in that the check valve (13) is arranged in an annular gap (14) surrounding the piston guide sleeve (4) in the region of the pressure medium inlet (10).
