Abstract (en)

[origin: WO2011104258A2] The invention relates to a recessed light (1) having a base body (10) for holding a light source (15) and a dome-shaped reflector (25) which can be detachably fastened to the base body (10) by means of a connecting element. The connecting element is designed such that an optical element (30, 31) for influencing the emission of light is accommodated and fixed when the base body (10) and the reflector (25) are fitted together.
