Abstract (en)

[origin: WO2011104254A1] The invention relates to an elevator system (1) comprising an elevator car (10), elevator doors (15), a drive (20), an elevator control system (30), and a counterweight (13) which can be moved in the opposite direction to the elevator car (10). The elevator control system (30) comprises a door control module (31) or can be connected to a door control module (31), which predefines a standard time for holding the doors open or an extended time for holding the doors open, depending on the load situation of the elevator car (10).
