Abstract (en)
[origin: EP2540188A1] The device has a connector (1), at which a band end element (5) of the wristband is fixed and whose housing-sided end is fixed at a wristband bar (9). The wristband bar is laterally attached at a housing (7). The device has a blocking element (3) that is pivotally mounted at a locking element (2). The blocking element releases the wristband bar depending on the position of the locking element. The wristband is made of metal, leather, rubber, synthetic material or plastic.
