Abstract (en)

[origin: EP2540363A1] The coupling device (11) has a coupling body (12) and a bearing (14), where a carriage vertical axis (6) is pivotally mounted with the coupling body. A drawbar (13) is provided, through which the coupling body is attached on the bearing to keep a distance from the bearing. One among contact ridges (26, 27) is magnetized such that two of carriages (1) are coupled by magnetic attraction at a contact of one contact ridge of one carriage with another contact of another contact ridge of another carriage.
