Abstract (en)

[origin: EP2540635A1] The cup (10,12) has base portion (16) and casing (14). The base portion in the region of lower end of fillable inner space is connected with casing in liquid-tight manner. The outer sheaths (28) are provided for covering the casings. The outer sheath is connected with the lower region of recess (24). The casing is connected with the upper region of recess. An independent claim is included for method for manufacturing cup.
