Abstract (en)
[origin: EP2540899A1] A machine (10) for treating laundry which machine (10) comprises a cabinet having an outside wall (14) which has an opening (16) for introduction of laundry into the machine (10), a door (18) for closing the introduction opening (16), and a lock (20) for locking the door (18). The machine further comprises a safety device. The safety device is adapted to be activated as a result of, and concurrently with, a person's action outside of the machine (10). In activated condition the safety device permits the lock to lock the unlocked door and in non-activated condition it prevents the lock from locking the unlocked door. Also claimed: a kit of parts for a machine (10) for treating laundry and a door (18) assembly for a machine (10) for treating laundry.
