Abstract (en)
[origin: EP2541185A2] A closure (1) for break-action firearms which includes a barrel assembly (2) which is hinged to a break-action assembly (3) so as to form a closed position and an open position of the firearm; the barrel assembly (2) has a breech end which is opposite with respect to a breech face of the break-action assembly (3) when the firearm is in the closed position. The structure is characterized in that it includes a plate (6) which is associated with the break-action assembly (3) and is interposed between the breech end of the barrel assembly (2) and the breech face of the break-action assembly (3) in the closed position, in which the plate (6) closes the breech end by virtue of a means (8-11) for the temporary locking of the plate (6) on the barrel assembly (2).
