Abstract (en)

[origin: CA2792947A1] The invention relates to a method and system for milling coal in inert operation or in non-inert operation, wherein a part of the coal dust produced in a mill (5) is fed to a separator (10) in order to separate fines (20). The fines (20) are rendered to a hot gas generator (12) having a solid fuel burner in order to heat the returned process gas and to feed said process gas back to the mill (5). The self-produced coal dust is thus used for hot gas generation.
