Abstract (en)

[origin: WO2012143959A1] The present invention relates to a thermal platform comprising a walking surface provided with a plurality of apertures, a supporting structure for the walking surface, air flow generating means, air heaters and a heating chamber where air heaters are housed, wherein the heating chamber at the top is delimited by said walking surface and the air generating means are arranged under the walking surface; the present invention further relates to a paving comprising a plurality of such platforms. The thermal platform can be operated even only for ventilating the outdoor space.
