Abstract (en)

[origin: EP2543814A1] A holder main portion (12) comprises a chisel receiving opening (18) extended in the direction of a chisel insertion end (14) of the main portion. A fastening shaft (26) is extended from a supporting end (20) of main portion along longitudinal shaft axis. The main portion is equipped with supporting surface regions (22,24) at the supporting end, in which one surface region (24) is extended at an angle from the other surface region (22). The surface region (22) is comprised of a supporting surface (30) extended at an angle from another supporting surface. An independent claim is included for chisel holder system.
