Abstract (en)

[origin: US2014104991A1] Timepiece movement (1) driving at least one output wheel set (3), from a means (2A) of generating a time magnitude, or a means (2B) of detecting the magnitude of the state of a control member of this movement, or a means (2C) of measuring a physical magnitude, the position of this output wheel set (3) being linked to an instantaneous value of this magnitude, displayed on a swivelling display base (10) and including a display wheel set (4) cooperating with this output wheel set (3). This display wheel set (4) is permanently coupled to this output wheel set (3) and this movement (1) includes a supplementary wheel set (5) pivoting synchronously or in an integer pivoting velocity ratio relative to supplementary wheel set (5). Timepiece (100) including a movement (1) of this type.
