Abstract (en)  
[origin: WO2011110200A1] The invention relates to a shower partition having a partition pane, which is inserted in at least one U-shaped profiled rail and is composed of glass, characterized in that an adhesive material coating (27) having an adhesive effect designed for a rigid connection to a glass surface is applied to the inner face of at least one leg (22) of the profiled rail (20) that lies on the glass pane installed in the profiled rail (20), and, after the glass pane (16), which has previously been wetted with a mixture comprising water and an agent that reduces the surface tension of the water, has been slid in and oriented, the profiled rail (20) has a position-fixing clamping effect on the glass pane (16) that has been inserted into the profiled rail (20) and positioned therein.
