Abstract (en)

[origin: WO2011110243A1] The invention relates to a metering device (1), which can be positioned in a dishwasher, for discharging preparations (2) into the interior of a dishwasher, comprising at least one light source (3) and at least one light sensor (4), which is suitable for detecting the light (L) emitted by the light source, wherein the metering device (1) comprises at least one means (5) for conducting washing water (6), which conducts washing water (6) between the light source (3) and the light sensor (4) during the operation of the dishwasher in such a way that the washing water (6) at least partially intersects with the beam path of the light (L).
