Abstract (en)
[origin: WO2011110754A1] The invention relates to a packaging that is of small size after use, economic, and practical to use, while preventing the users from soiling the fingers thereof during the opening process and when holding the product. The invention relates to a portionable packaging for a food product, which includes, in reference to the assembled packaging: a side strip (20) having two longitudinal edges (20a) connected by two end edges (20b), and having at least one curvature and/or fold to delimit a storage space for the food product (CP), two panels (10) each having a surface (10a) intended to be contacted with the product (P) and connected to a side edge (10b) which is substantially perpendicular to the surface by a folding line, the strip being attached in a detachable manner by pealing on the panels by the respective side edge thereof, in such a manner as to enclose the food product in the storage space.
