Abstract (en)
[origin: WO2011110749A1] The object of the invention is a method in connection with a foundation for tower-like structures and a foundation. The tower (1) and the foundation (2) are formed as steel-reinforced concrete structures. The steel tendons (3) of the tower (1) are guided to the edges of the foundation (2) and anchored to the edges of the foundation (2). Post-stressing of the tower (1) and the foundation (2) is carried out simultaneously.
