Abstract (en)
[origin: WO2011111031A2] Door screen system comprising: a first retractable door screen (10) having a first side attached to a first retracting mechanism (12), provided for rolling up the first door screen and a second side attached to a first handle (14), provided for sliding the first retractable door screen in/out, a second retractable door screen (30) having a third side attached to a second retracting mechanism (32), provided for rolling up the second door screen, and a fourth side attached to a second handle (34) provided for sliding the second retractable door screen in/out, wherein the first and second retractable door screens (10, 30) are mounted on opposite sides of a doorway; coupling means (40) which interconnect the first and second retractable door screens such that a displacement of the first retractable door screen (10) brings about a similar displacement of the second retractable door screen (30) and vice versa.
