Abstract (en)
[origin: WO2011110688A1] The subject matter of the invention is a plug-type connector, comprising a contact carrier element (10), wherein a contact element (16) for receiving a litz wire (12) of a cable is arranged in the contact carrier element (10), wherein the contact element (16) is fixed in the contact carrier element (10), wherein, in the event of a force being exerted on the contact element (16) which is greater than the holding force of the fixing, the fixing can be released and the contact element (16) is mounted movably in the contact carrier element (10).
