Abstract (en)

[origin: EP2545996A2] The acceleration tool has an acceleration element (20) that is mounted on a support (22.1) having support surfaces (22.2,24.2). The hard material elements (23) are fitted on the support surface facing away from front side of the acceleration surface. The hard material elements arranged in mutually parallel rows. The spacer portions (25) are set back relative to plane formed by the hard material elements. An independent claim is included for a spin profile for crusher with rotary carrier having mounting face.
