Abstract (en)

[origin: EP2546027A1] The clamping device (100) comprises clamping jaws (7), which take a defined clamping distance in a clamping position, in which a workpiece is held. An adjusting device is provided for presetting different defined clamping distances depending on the measurements of the workpiece that is clamped. The adjusting device is incorporated in a guide housing (8), in which a guide element is guided movable on a defined adjustment path.
