Abstract (en)

A portable retractable turbomachine enclosure canopy system 20 includes a first rail member 28 configured and disposed to be mounted to a first wall of the turbomachine enclosure, and a second rail member 29 configured and disposed to be mounted to a second wall of the turbomachine enclosure. A first fixed canopy support member 34 is mounted to the first rail member 28, and a second fixed canopy support member 35 is mounted to the second rail member 29. A first sliding canopy support member is seated on the first rail member 28, and a second sliding canopy support member is seated on the second rail member 29. An adjustable canopy support element is moveably secured between the first and second fixed canopy support members to form a fixed canopy support, and an adjustable canopy support member 48-56 is moveably secured between the first and second sliding canopy support members 48-56 to form a sliding canopy support.
