Abstract (en)

[origin: WO2011113669A1] The invention relates to a device (50) and method for feeding a separating layer (100) from a separating layer storage device (101) onto the surface of a metal band (200) to be wound up on a coiler (201). A nozzle device (300) operated by compressed air is disposed within the device (50), wherein said nozzle device (300) is designed for generating an air flow (302), for suctioning and securing the separating layer (100) on the nozzle device (300).
