Abstract (en)  
[origin: WO2011115564A1] The present invention refers to a solid tread (20) for an industrial truck wheel (10) or an industrial truck roll (10), where at least one of the side surfaces (20a, 20b) of the tread (20) has an electrically conductive coating (30a, 30b) that reduces the generation of electrostatic charge in the tread (20). The invention further refers to an industrial truck wheel (10) with such a tread (20), an industrial truck with such an industrial truck wheel (10) as well as a method of reducing generation of electrostatic charge at an industrial truck wheel (10).
