Abstract (en)
[origin: WO2011115548A1] The present invention is providing a whole coil packaging system comprising a coil wrapping machine (10) comprising a frame (11), a wrapping ring (12) and a wrapping head (13) arranged to rotate around the wrapping ring (12). Further the system comprises a coil rotating means (20) adapted to carry and to rotate a coil (50). The invention is characterized in that the coil wrapping machine and the coil rotating means are both attached to one transportable platform (40). The packaging system is compact, transportable and adapted to easily be unloaded and quickly to be taken into production use.
