Abstract (en)

[origin: WO2011115557A1] The invention relates to a construction system (101) for walls (102) situated above the ground and that comprise thermal insulation having an applied surface layer (105). According to the invention, an inner insulating panel (103), which is carried on the wall, has a thermal insulating function as well as a draining function. A surface layer in the form of render forms an external surface layer (105) outside said inner insulating panel (103).
