Abstract (en)
The present invention relates to a collapsible container (10) comprising a base (12), a first pair of opposed walls (14) and a second pair of opposed walls (16), the first pair of opposed walls and the second pair of opposed walls defining an opening in the top of the container, wherein the container further comprises at least one stacking member (18) which, when the container is erect, is movable between a stacking position in which the stacking member is positioned to support the base of another container thereon and a filling position in which the stacking member is substantially removed from the opening in the top of the container, and wherein the container further comprises at least one locking element (20) for securing the at least one stacking member to the container.
