Abstract (en)
[origin: EP2549025A1] The module (10) has notches (11, 21, 31, 41) placed in lateral uprights (13, 23, 33, 43) to allow passage of pipes and distributed on the uprights on both sides of a horizontal symmetry axis (S). Two central notches, surrounding the axis of symmetry, are practiced, so that spacing (E) of the central notches corresponds to a standard spacing of forks of a fork lift truck. Intermediate uprights include notches aligned with the notches of the side uprights. The notches are partially closed again after the passage of the pipes.
