Abstract (en)
[origin: EP2549033A1] The structure has two gates each comprising vertical posts (2) that are connected by cross-pieces. A male part (6) is cooperated with a female part (7). The male part comprises cylindrical elements (6a, 6e) arranged between two protruding elements. The cylindrical elements have outer diameter that is equal to inner diameter of an inner tube at an end of a breakdown tip (5). The outer diameter of the cylindrical elements is less than diameter of a tube of the female part at an opposite end of the tip.
