Abstract (en)

[origin: EP2549213A2] The supply cabinet (1) has a frame (2) with an engagement contour, in which a supporting strut is inserted detachably and with variable arrangement. The supporting strut is provided with a complementary engaging element. The engaging element is designed complementary to the engagement contour. The supply cabinet has two climate zones which are independent from each other and are thermally or climatically separated from each other. The frame is inserted in each of the climate zones. The frame is mounted detachably on a telescopic rail mechanism (8).
