Abstract (en)

[origin: EP2549216A2] The storage cabinet (1) consists of several plates (13) which are pulled out on a telescopic mechanism, and a support grid (5) for storage or receipt of beverage bottles. The support grid comprises a frame including two transverse struts connected with the longitudinal struts. The support struts are arranged within the support grid along the longitudinal direction in parallel to each other. A label strip (6) provided with information is releasably attached to the front transverse strut of support grid. The grid and/or the label strip consist of ceramic, wood or metal.
