Abstract (en)
[origin: WO2011117897A1] There is disclosed a method for rotating at least one group (3) of at least two containers (2), comprising the step of : advancing group (3) along a first direction (A); the step of advancing comprises the steps of: moving a first portion of group (3) onto a first conveyor (15) along first direction (A) at a first speed value; and moving a second portion of group onto a second conveyor (16) along first direction (A) at a second speed value which is different from first speed, so as to rotate group (3) about a second direction (B) which is transversal to said first direction (A).
