Abstract (en)

[origin: WO2012113471A1] The invention relates to a drawing roller arrangement having a first drawing roller (09) and at least two pull rings (11, 12) or sections of a second drawing roller that are arranged offset in the axial direction of the first drawing roller and can each be placed against the first drawing roller. At least one catcher roller (21) that can be placed against the first drawing roller is provided inside the drawing roller arrangement, wherein the first drawing roller and the at least one catcher roller are arranged axially parallel to each other. The at least one catcher roller has a drive and in the operating state of the catcher roller disengaged from the first drawing roller, is arranged so as to be driven in rotation by the drive.
