Abstract (en)

[origin: WO2011116493A1] A steel cord (10) for reinforcing rubber product comprised core strands (12) and outer strands (14), the outer strands (14) are helically twisted around the core strands (12). Each of the strands including core strands (12) and outer strands (14) comprises core steel filaments (20) with the number of m and outer steel filaments (22) with the number of n. the diameter of the core steel filament (20) in the core strand (12) is Dec, the diameter of the outer steel filament (22) in the core strand (12) is Doc, the diameter of the core steel filament (20) in the outer strand (14) is Deo, the diameter of the outer steel filament (22) in the outer strand (14) is Doo, the ratio of Dec/Doc is not less than 1.04, the ratio of Dco/Doo is not less than 103, the ratio of Doc/Deo is not less than 1. The core steel filaments (20) and outer steel filaments (22) are polygonally preformed before being twisted into strands. The steel cord (10) is used for reinforcing off-the-road tire.
