Abstract (en)
[origin: WO2011119025A1] Movable platform comprising a deck structure with at least one leg, wherein the legs are fitted with suction piles for anchoring in a sea bottom, wherein the legs are adjustable between a transport position wherein the legs substantially extend above the deck structure of the platform for transport of the platform on a barge and an installation position wherein the legs substantially extend below the deck structure of the platform for installation of the platform on the sea bottom, wherein each leg comprises an isolated stiffening structure at the connection with the suction pile, for artificially heightening the sea bottom and wherein in the transport position at least a part of the stiffening structure extends above the underside of the deck structure.
