Abstract (en)  
[origin: CH703725A1] The interface (6) has an output widget (W13) and target widgets (W13a-W13c) arranged on a work area such that the widgets are visible to a user. The output widget comprises content windows (F13) provided with data elements. The widgets and the content windows are coupled with each other such that the selected content windows and/or data elements are moved from the output widget by the user for processing in the target widgets that are visible to the user during selection of the content windows and/or data elements. Independent claims are also included for the following: (1) a computer-implemented method for generating a graphical user interface (2) a computer program product comprising instructions to perform a method for generating a graphical user interface (3) a computerized device comprising a display.
